

SAMPLE LLC | Fictional Analog Programming Guide

This is a synthetic, fictional sample document for testing extract_pdf.py. All callsigns, frequencies, and locations below are made up and do not represent real stations or repeaters. It mimics the table structure of a RAINWorks LLC-style "Standalone Analog Programming Guide" so you can test-drive this toolkit's PDF extractor without needing a real purchased guide.

Fixed Base Bank - CH1-5

Fictional calling/simplex sample channels.

CH	Name	RX MHz	TX MHz	BW	Tone	TX Off	Service / Use
1	SAMPLE1	146.520000	146.520000	25K	Off	No	Fictional simplex sample
2	SAMPLE2	146.550000	146.550000	25K	Off	No	Fictional simplex sample
3	WXTEST	162.400000	162.400000	25K	Off	Yes	Fictional receive-only sample
4	SAMPLE4	446.000000	446.000000	25K	Off	No	Fictional simplex sample
5	NARROW5	151.820000	151.820000	12.5K	Off	No	Fictional narrow-FM sample

Local Add-ons - 00000 / Sampleville

Local/regional fictional amateur repeater add-ons for sample ZIP 00000.

CH	Name	RX MHz	TX MHz	Tone	ZIP	Use / Location
6	N0REP1	146.790000	146.190000	131.8	00000	Sampleville; fictional repeater
7	N0REP2	147.300000	147.900000	100.0	00000	Sampleville; fictional repeater
8	N0REP3	442.400000	447.400000	91.5	00000	Sampleville; fictional repeater
9	N0REP4	145.410000	144.810000	127.3	00000	Sampleville; fictional repeater
10	N0REP5	147.030000	147.630000	Off	00000	Sampleville; fictional open repeater
